Creation

05 · PROGRAM CREATION

> *Create only what is necessary to move forward.*

BUILD AS YOU GO

A clear structure and a strong first session are all you need to start. By the end of this session, your first session has its slides, your notes, its worksheet and its Principle Card.

JUST-IN-TIME COACHING PROGRAM CREATION

What it is	Build only your first session in full now. Once you have a client, deliver it, then build the next session from how it went. Keep the rest rough, and fill each one in just in time
It gets you started	It stops you from procrastinating
It makes your program better	You know exactly what the next session needs, because you've just seen how the last one went

THE SIX STEPS, IN TWO SITTINGS

1 · The big picture	Your client's journey, in two or three lines
2 · Your first session's slides	Your first session only. Change each slide: title · transformation · objective · key points · exercise · action items
3 · Your speaking points	A few words in the notes under each slide. Say the session out loud once
4 · Your worksheet	One page your client fills in. Every box something they do
5 · Your Principle Card	One line to remember, then your key points
6 · Build just in time	Build each session after delivering the one before, shaped by how that one went

THREE KEY POINTS WE RECOMMEND FOR A FIRST SESSION

The Blueprint	What your program looks like and what it covers
The Required Mindset	The beliefs your client needs to make it work
Success Factors	What raises their chances of reaching the transformation
Your call	Change any of them if your first session needs something different

THE FLOOR: CLEAR IT AND STOP

One objective	In a single sentence
Three to five key points	Usually one per unit
One exercise	Something they do in the session
One action	What they leave with

TWO QUESTIONS FOR A SLIDE THAT WON'T COME

Knowing everything I know...	...what would I say to somebody going through this?
If it were happening to me...	...what would I do about it?

AFTER EACH SESSION YOU DELIVER

Note how it went. What landed, and what didn't. What needed more explaining, and what was unnecessary. What resonated, and where your client glazed over.

KEEP IT SIMPLE

A few points per slide. Practical, not theoretical. Only resources your client uses. Done beats perfect.

BUILD · DELIVER · IMPROVE

> *Use your research, experience and expertise to create something you can deliver. Then deliver it, and let your clients show you how to make it better.*
